

Nigeria's Beautiful Minds

Website Visual Design Guide

Color system, interface direction, typography, components and imagery guidance for the NBM website.

CONNECT. COLLABORATE. BUILD.

A credible, modern and welcoming Nigerian research and innovation community.

Design intent

NBM should feel credible, modern, distinctly Nigerian, research-oriented and socially engaging. The visual system should avoid looking like a government portal, a generic technology startup, or an overly decorative social network. Green anchors the identity, while neutral space, strong typography and authentic imagery provide clarity and trust.

Core palette at a glance

	NBM Deep Green #064E3B		Nigeria Green #008751		Emerald #10B981
---	---------------------------	---	--------------------------	---	--------------------

1. Color System

Use green as the NBM signature, but not as the background of every surface. Dark green gives institutional credibility, Nigeria Green gives immediate national identity, and Emerald supplies energy for interactive states.

Color	Hex	Role	Recommended use
NBM Deep Green	#064E3B	Primary brand color	Header accents, footer, strong headings, dark sections
Nigeria Green	#008751	Primary action	Buttons, active navigation, links, key calls to action
Emerald	#10B981	Interactive accent	Highlights, success states, connection graphics
Warm White	#FAFCFA	Main background	Page canvas and calm negative space
Charcoal	#17211D	Primary text	Body copy and high-contrast UI text

Minor and accent colors

	Soft Green #E8F5EE		Gold #D4A72C		Discussion Blue #2D9CDB
	Mentorship Indigo #5267C9		Attention Coral #E76F51		Get Involved Teal #0F766E
	Light Gray #F3F5F4		Border Gray #DCE3DF		Muted Text #68756E

Recommended balance: approximately 65% white/neutral, 20% deep green, 10% green/mint and 5% accent colors.

2. Interface Direction

The interface should be content-first, spacious and easy to navigate on desktop and mobile. Cards should feel clean and editorial, while social interactions remain visible but secondary to the research or project itself.

Desktop header

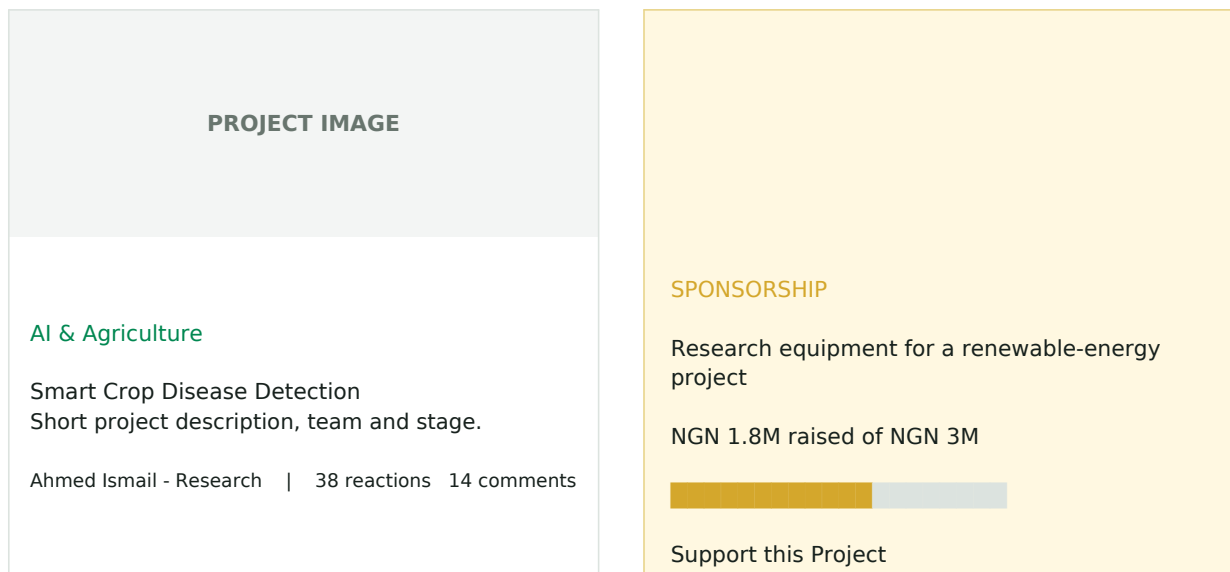

Homepage hero

3. Component Design

Cards and calls to action should be consistent across the platform. Use 16 px-style corner radii, subtle borders, minimal shadows, generous spacing and green tags rather than heavy green panels.

Feature accents

Section	Accent	Purpose
Home	#008751	Core NBM identity and primary actions
About	#064E3B	Institutional trust and mission
Get Involved	#0F766E	Participation and community action
Exhibitions	#10B981	Projects, discoveries and creative work
Discussion	#2D9CDB	Conversation and live audio
Mentorship	#5267C9	Guidance, learning and matching
Sponsorship	#D4A72C	Funding and project support

4. Typography and Visual Language

Recommended heading typeface: Manrope or Plus Jakarta Sans. Recommended body/interface typeface: Inter. If implementation constraints require system fonts, preserve the same visual hierarchy and spacing.

Type scale

Role	Suggested size	Weight
Hero	56-64 px	700
H1	44 px	700
H2	32 px	650-700
H3	22 px	600-700
Body	16-18 px	400
Metadata	13-14 px	400-500

Button system

Imagery direction

Use authentic, realistic imagery of Nigerian researchers, students, engineers, innovators, laboratories, prototypes, field work and collaborative sessions. Combine this with restrained global-connection graphics that show Nigerians across the world linking back to Nigeria, plus minimal icons for mentorship, discussion, funding and collaboration.

Avoid generic AI imagery as the dominant visual language. NBM should show real work, real people and real progress. Network visuals are strongest when used as hero or campaign graphics rather than as decoration on every page.

Talent has no borders. Neither should collaboration.

Connect with Nigerian researchers, innovators and mentors around the world.

Overall personality

The finished site should feel like a blend of a modern research institution, a professional networking platform and a warm Nigerian innovation community - credible enough for researchers and sponsors, but accessible enough for students and first-time contributors.
